EXPERIENCE

SOC Analyst Intern

August 2024 – December 2024

University of Texas Systems (UTS)

San Antonio, TX

- Monitored **30,000+** endpoints and **36,000+** users, performing log analysis and triaging alerts enterprise EDR, SIEM and MFA solutions
- Utilized playbooks and response templates to streamline incident response processes and ensure consistent and effective mitigation of security threats
- Assessed the security impact of alerts and traffic anomalies to identify malicious activities, taking mitigating actions or escalating to senior team members when appropriate

Information Technology Systems Intern

May 2024 – July 2024

Sweetwater

Fort Wayne, IN

- Collaborated in the implementation, modification, and troubleshooting of computer systems services over **3,000** endpoints and **2,500** users
- Managed devices using JAMF's MDM solution. Utilized Infoblox to manage DHCP rules, and utilized SNIPE's asset inventory features

COMPETITIONS

Forensics Lead, Department of Energy (DoE) CyberForce Competition: 9/101

November 2024

- Performed vulnerability assessments on windows machines using NESSUS, and documented any findings and possible remediations
- Conducted system hardening on Windows devices using Group Policy Objects, firewall configuration and performing an audit of user accounts ensuring principle of least privilege
- Led the team for forensics based CTF challenges which included OSINT, PCAP analysis, Zeek traffic analysis, and static analysis of files achieving **9th Place nationally**

National SimSpace Cyber Cup: 2nd Place

February 2025

- Effectively responded to and documented security incidents in a virtual environment and submitted our findings for scoring based on accuracy
- Employed an array of security tools such as Elastic, Splunk, and Security Onion to detect a chain of events including initial access, lateral movement, and persistence while conducting incident response

National Cyber League (NCL): 11/461

April 2025

- Demonstrated proficiency in digital forensics by performing log analysis, traffic analysis, and PCAP forensics to successfully identify and extract exfiltrated data
- Applied web assessment skills to identify and exploit vulnerabilities, alongside leveraging OSINT to gather critical information about known threat actors

CERTIFICATIONS

- CompTIA Security + Expires April 2027
- CompTIA Cybersecurity Analyst (CySA+) Expires April 2027
- HTB Certified Defensive Security Analyst (CDSA) December 2024
- HTB Certified Bug Bounty Hunter (CBBH) April 2025

EDUCATION

University of Texas at San Antonio

Bachelor of Business Administration in Cyber Security

Graduating May 2025

3.97 Deans list
